

Customize Your Wash & Dry Cycle

The NEW Revolution® machines in your laundry room allow you to customize how you wash & dry your laundry.

You don't have to settle anymore. **You have a choice.** You have the freedom to choose your wash & dry cycle.

- Do you have items that need to be washed in HOT water? ... Towels & Bed Linens?
- How about items that need to be washed in COLD water? ... Colours?
- Are your kids clothes really dirty and just need some extra time in the wash? ... Heavy Cycle?
- How about your delicates? You have a choice to wash in COLD, WARM or HOT. You can finally make the choice.

The Revolution® washer & dryer machines allow you to do all of the above and even more. You can pick up to 27 different wash/dry combinations!

The best part? You only pay for what you use.

Coinamatic puts you in control of your laundry.

Quick Facts About High Efficiency Front Load Washers

- Front loading washers are the latest advancement in washing machines. They use less water and energy and detergent than regular machines and are gentle on fabrics.
- The laundry gently tumbles back and forth, and is lifted in and out of a concentrated solution of water and detergent.
- The tumbling action cleans efficiently with less stress on the fabrics. With the gentle tumble action and no agitator, clothes experience less wear and tear. They last longer and look better.
- Front load washers are ideal for washing items such as comforters (no larger than double size) and sleeping bags.
- They are also great for delicate items. There is no agitator for delicate items to get wrapped around, although we do recommend using a mesh bag for delicates.
- Even though front loading washers use far less water, they provide more rinse time than a traditional washer. Multiple rinses are better than one deep rinse.
- The high efficiency front load washers have a high spin speed extracting more water from the clothes resulting in less time in the dryer.
